WORK EXPERIENCE

Data Engineer | Gosian Media LLC

South Carolina | June 2025 to Present

- Built a PostgreSQL database on AWS RDS, migrating 30+ legacy spreadsheets into a normalized relational schema.
- Developed containerized Python scripts using Docker to extract data from REST APIs and web sources, automating ETL ingestion and improving consistency of data supplied to the product team.
- Implemented dbt-based ETL workflows for recurring data transformations and created automated validation tests to identify data anomalies before downstream analysis and modeling.
- Engineered automated Python pipelines to replace legacy data collection processes, eliminating 10+ hours of manual data entry per week and ensuring strict data consistency across the organization.

Data Analyst | Influencer Hub

United Kingdom | November 2023 to June 2025

- Analysed influencer engagement, audience demographics, and campaign performance datasets to support marketing strategy and campaign decisions.
- Automated daily and weekly KPI reporting workflows via Python and Tableau, eliminating manual data aggregation and scaling reporting visibility for a department of 15+ stakeholders.
- Developed ETL workflows to extract, clean, and standardise data from social media APIs into structured formats for analysis and reporting.
- Helped design campaign A/B tests, assess statistical significance, and present findings to senior stakeholders.

Data Administrator / Operations Analyst | TapIn Platforms, Inc.

Miami, Florida | October 2021 to November 2023

- Managed relational databases, performing daily validation and record updates to support accurate operational data.
- Used Advanced Excel and SQL to identify business trends, track user growth, and report on operational metrics.
- Identified inefficiencies in raw data collection and proposed software solutions that successfully centralized the company's internal knowledge base.
- Supported product and marketing teams by fulfilling ad hoc data requests and writing SQL queries to extract specific user cohorts.

Operations & Data Assistant | Coefficient & NPC

Johannesburg, South Africa | July 2019 to September 2021

- Digitized legacy business records and validated daily operational data across CRM, inventory, and financial systems.
- Supported data integration and market analysis for Inea Consulting and Renewable Market Watch outlook reports.
- Executed monthly data reconciliations to investigate discrepancies and ensure accurate end-of-month reporting.

PROJECTS

Tech Job Market ETL Pipeline | Python, PostgreSQL, Pandas, GitHub Actions
Automated data pipeline extracting daily hiring trends from public APIs, staged in a normalized PostgreSQL schema via GitHub Actions.

E-Commerce Sales & Logistics Dashboard | SQL, Tableau, PostgreSQL
Interactive Tableau dashboard utilizing advanced PostgreSQL queries to analyze 100,000+ records and identify regional logistics bottlenecks.

Customer Churn Predictive Model | Python, Scikit-Learn, Pandas
Supervised machine learning classification model (Random Forest) utilizing feature engineering to predict subscription retention with 85% accuracy.

TECHNICAL SKILLS

Python, SQL (PostgreSQL), Bash, AWS RDS, Docker, dbt, Tableau, Pandas, Scikit-Learn

EDUCATION & CERTIFICATIONS

University of Suffolk | BSc (Hons) Computer Science | Expected 2027
UNISA | Mathematics and Statistics Higher Certificate (Distinction) | 2024
Certifications: Google Data Analytics Professional Certificate; IBM Data Engineering Certificate
