PROJECTS

Wikipedia Streaming Lakehouse | Kafka, Spark Structured Streaming, DuckDB, Terraform
Wikipedia edits through Kafka and Spark into Parquet, tested on real Kafka in CI. Terraform validated, not deployed.
github.com/VasilenData/wiki-stream-lakehouse

NYC Taxi Data Platform | Dagster, dbt, DuckDB, Docker
31.6M trips with an enforced data contract; rejected rows (2.8%) quarantined with reasons; blocking checks stop a bad month. Builds in 62 s. github.com/VasilenData/nyc-taxi-data-platform

HN Pulse: Live Data Pipeline | Python, dbt, Airflow, DuckDB, GitHub Actions
Hacker News API through dbt (27 data tests, enforced contracts) into DuckDB; failing tests block the live dashboard.
vasilendata.github.io/hn-pulse/

Data Contracts Platform | Python, DuckDB, YAML, pytest
YAML contracts with a DuckDB validator and a breaking-change detector that enforces version bumps. Fitted on Jan 2023 NYC taxi data (3.07M rows), it passed January and failed all 11 later months on real drift (195 tests).
github.com/VasilenData/data-contracts-platform

Evaluated AI Research Assistant | llama.cpp, BM25, fastembed, NLI
Local 1.5B model over 2,835 arXiv abstracts; retrieval lifts correct answers from 3.8% to 50.6%; judge accuracy 85.5% reported. github.com/VasilenData/research-assistant-eval

E-Commerce Finance Mart | DuckDB, SQL, BigQuery, Databricks, Excel
1.07M real invoice lines (public UK retail data) in a star schema reconciled to the penny, also in BigQuery and Databricks Free Edition; 32 tests, Excel model, explorer, Tableau. vasilendata.github.io/ecommerce-finance-mart/explorer/

A/B Test Analysis | Python, SciPy, pytest
Real 90K-player experiment, tested toolkit (SRM, Holm, sequential tests, CUPED); day-7 retention fell 0.82 points, p = 0.0016.
github.com/VasilenData/ab-test-analysis

BigQuery Cost Lab | Python, SQL, BigQuery, pytest
Measured BigQuery query cost: SELECT * with LIMIT would scan 2.38 TB, a day filter 85 MB. Tested linter (22 tests).
github.com/VasilenData/bigquery-cost-lab

WORK EXPERIENCE

Chief Revenue Officer and Data Engineer | Gosian Media LLC
South Carolina | June 2025 - Present

- Lead 80 employees. Personally recruited and trained 30+ of them and wrote the SOPs and training manuals that standardize onboarding.
- Built a revenue-versus-cost tracking system by department, then cross-trained flexible staff to cover two roles: cut cost of goods sold by about $10K a month and raised performance in the strongest departments by KPI.
- Joined at about $80K in monthly revenue; now about $600K a month (7.5x), with profit up $60K+ a month after all expenses.
- Built the PostgreSQL database on AWS RDS (30+ spreadsheets migrated) and the Docker, Python and dbt pipelines with validation tests behind it, replacing 10+ hours a week of manual data entry.

Data Analyst and Senior Supervisor | Influencer Marketing Hub
United Kingdom | November 2023 - June 2025

- Led the afternoon shift of a three-shift operation, directly overseeing 150 employees and generating about $3M a month in revenue for that shift.
- Automated KPI reporting with Python and Tableau for 15+ stakeholders; built ETL from social media APIs; supported campaign A/B tests.

Data Administrator / Operations Analyst | TapIn Platforms, Inc.
Miami, Florida | October 2021 - November 2023

- Managed relational databases with daily validation and record updates.
- Used Excel and SQL to track user growth and report operational metrics.
- Supported product and marketing teams with ad hoc SQL requests.

Operations & Data Assistant | CoEfficient & NPC
Johannesburg, South Africa | July 2019 - September 2021

- Digitized legacy records and ran monthly reconciliations across CRM, inventory and finance systems.

Professional Coach and Player | Valorant Friends League & Community
Deggendorf, Germany | 2020 - 2025, alongside full-time roles

- Reached #1 global VALORANT ranking; won multiple international LAN tournaments across Europe.

TECHNICAL SKILLS

Python, SQL (PostgreSQL, window functions), Excel, dimensional modeling, data contracts, Bash, AWS RDS, Docker, dbt, Airflow, DuckDB, Kafka, Spark, Polars, Terraform, Dagster, MLflow, FastAPI, GitHub Actions, Tableau, Pandas, Scikit-Learn

EDUCATION & CERTIFICATIONS

University of Suffolk | BSc (Hons) Computer Science | Expected 2027
UNISA | Mathematics and Statistics Higher Certificate (Distinction) | 2024
Certifications: Google Data Analytics Professional Certificate; IBM Data Engineering Certificate
